

Cybersecurity Internship Project Portfolio

Samuel Nweke

Professional Summary

Aspiring Cybersecurity Analyst with hands-on experience in ethical hacking, network troubleshooting, wireless security testing, and phishing detection using industry-standard cybersecurity tools and virtual lab environments. Demonstrated practical skills through penetration testing labs on TryHackMe and real-world cybersecurity simulations using Kali Linux.

Technical Skills

- Virtual Machine Installation & Configuration
- Linux Administration
- Network Troubleshooting
- VPN Configuration
- Wireless Network Security Testing
- Ethical Hacking Fundamentals
- Phishing Email Detection
- Penetration Testing
- Command Line Interface (CLI)
- Cybersecurity Lab Setup

Tools & Technologies

- VirtualBox
- Kali Linux
- Aircrack-ng
- ifconfig
- rockyou.txt
- WLAN Configuration
- VPN Services
- TryHackMe

Cybersecurity Projects

1. Virtual Machine & Kali Linux Environment Setup

Objective

Installed and configured a secure virtual penetration testing environment for cybersecurity training and ethical hacking practice.

Tasks Performed

- Installed VirtualBox on a local machine.
- Downloaded and configured Kali Linux as a virtual machine.
- Allocated system resources including RAM, storage, and network adapters.
- Configured networking settings for internet connectivity and lab testing.

Skills Demonstrated

- Virtualization
- Linux Installation
- System Configuration
- Network Setup

2. Network Optimization & IP Address Renewal

Objective

Improved network connectivity and troubleshooting skills using Linux networking commands.

Tasks Performed

- Used the ifconfig command to troubleshoot network issues.
- Renewed IP address configurations to restore internet connectivity.
- Verified network interfaces and monitored connectivity performance.

Skills Demonstrated

- Network Troubleshooting
- Linux Networking
- IP Configuration
- System Administration

3. VPN Configuration on TryHackMe

Objective

Established secure connectivity to cybersecurity training labs using VPN technology.

Tasks Performed

- Connected a VPN service to access TryHackMe labs securely.
- Verified VPN tunnel connectivity and network routing.
- Accessed isolated penetration testing environments safely.

Skills Demonstrated

- VPN Configuration
- Secure Networking
- Remote Lab Access
- Cybersecurity Environment Setup

4. RootMe Room Completion – TryHackMe

Objective

Completed the RootMe beginner penetration testing room to gain practical ethical hacking experience.

Tasks Performed

- Performed reconnaissance and enumeration techniques.
- Identified vulnerabilities within the target environment.
- Exploited weaknesses to gain root access successfully.
- Applied Linux privilege escalation concepts.

Skills Demonstrated

- Penetration Testing
- Vulnerability Assessment
- Enumeration
- Privilege Escalation
- Ethical Hacking

5. WLAN Connection & Wireless Network Configuration

Objective

Configured wireless networking on Kali Linux for cybersecurity testing and internet access.

Tasks Performed

- Connected Kali Linux to a WLAN network.
- Configured wireless adapters and verified connectivity.
- Tested network communication and signal stability.

Skills Demonstrated

- Wireless Networking
- Linux Wireless Configuration
- WLAN Troubleshooting

6. Wireless Security Testing Using Aircrack-ng

Objective

Performed educational wireless security testing in a controlled lab environment.

Tasks Performed

- Used Aircrack-ng to analyze wireless network security.
- Captured wireless handshake packets.
- Utilized rockyou.txt for password auditing and testing.
- Demonstrated understanding of weak password vulnerabilities in Wi-Fi security.

Skills Demonstrated

- Wireless Security Testing
- Password Auditing
- Ethical Hacking
- Wi-Fi Security Analysis

7. Phishing Email Identification

Objective

Analyzed suspicious emails to identify phishing attempts and social engineering indicators.

Tasks Performed

- Examined suspicious sender addresses and email headers.
- Identified malicious links and deceptive email content.
- Recognized common phishing techniques and attack patterns.
- Applied cybersecurity awareness principles to detect threats.

Skills Demonstrated

- Email Security
- Threat Detection
- Social Engineering Awareness
- Cybersecurity Analysis

Certifications & Learning Platforms

- Practical Labs completed on TryHackMe
- Self-paced cybersecurity training in penetration testing and Linux administration

Career Objective

Motivated cybersecurity enthusiast seeking internship opportunities to apply practical ethical hacking, GRC, network security, and threat analysis skills while contributing to organizational cybersecurity goals and continuously developing technical expertise.
